Exhausr steam should not be dis charged into a brick chimney; the steam will disintegrate the mortar, and the chimney be injured. A FLEXIBLE paint for canvass is made as follows: Yellow soap, 21 pounds; boiling water, 11 gallons; dissolve; grind the selution while hot with 125

pounds of good oil paint. A series of tests at the Firminy Steel

Works, France, on the resistance of steel wire to tensile and torsile strains, have conclusively shown that steel is superior to iron for wire ropes. English steel castings are made by some firms from old files in connection with other material, and are said to be

ound and very strong. It is said that he excess of carbon in the stock is found to be a clienty on tage. as follows: A sleeping car of the usual pattern, about 66,990 pounds; a draw-

ing-room car, 63,900 pounds; a passenger car, 55 feet long, 42-inch wheels, and four-wheel trucks, weighs 45,310 pounds. A SINGLE plate of perforated zinc, about a foot square, suspended over a gas jet, is said to retain the uoxious anations from the burning gas, which it is well known, destroys the bindings of books, tarnishes the gilding and vitiates the atmosphere for breathing.

A NEW speed indicator, called the strathmograph, for indicating the speed of locometives, has been introduced on the Hanoverian railroads. By it the engineer can read from a scale the actual speed of his locomotives at any moment, besides a record of the trip kept on a strip of paper.

THE long wooden tunnels covering forty miles of the Central Pacific Railway over the Rocky Mountains, costing per mile from \$8,000 to \$12,000, and in some places, where heavy masonry was needed, \$30,000 per mile, are firmly constructed to support the great weight of snow and resist the rush of avalanches. Fire precautions are very thorough. Corrugated plates of iron separate the buildings into sections, and in the great ten-mile shed there are automatic electric fire-alarms. At the summit is an engine and tank ready to flood the ignited spot in an iustant. These sheds shut in the view of the great Sierras, but without them winter travel would be impossible.

Twe Cats.

"The Spectator delights in cat stories. May I add one to the interesting list which has from time to time appeared in your columns? Picture to yourself a little girl, about two years of age, sitting on a low stool before a drawing-room fire. Coiled up on the rug is a favorite domestic cat. The child is in a fretful mood, and has been crying for some time. The cat endures the annovance for some time, though evidently displeased. But even feline patience has its limits. So pussy uncoiled herself, walked up to the child, and gave her a box on the ear with her closed paw, and then lay down again before the fire. The ehild, taken completely aback, cried londer than ever. Again pussy tried to endure it. Again her patience became exhausted, and she delivered a second box on the ear. It was now the girl's turu to be enraged. She rushed at the cat, and dragged it around the room by the tail. The story rests on the anthority of the child's mother, who was a witness of the scene."

"As I am a constant reader of the Spectator, I know you take a great iuterest in domestic animals, and I have long wished to tell you about 'Dot.' She was handsome as to size; her coat was a beautiful glossy black, and at the throat was a pretty white star. Each day, as the different articles were brought in for dinner and placed on the table, the charge always was, 'Now, Dot, come here and take care of this till I come back.' 'Dot' mounted guard at once on a chair at the side of the table. and was never known to leave her post till the viands were claimed. Whether it was beef, mutton, fish, or game, all was perfectly safe; and she was quite pleased when a cooked morsal, after dinner, was given to her as a reward. Her own diuner, though placed close beside her, she never touched, but always waited till it was given to her, however

hungry she was known to be. e was obedient to all orders, one of which was that she was not to come to my room. (I prefer to keep at a respeciful distance from even domestic pets, however excellent their individual characters.) But one very cold evening of a very severe winter, 'Dot,' passing all the other rooms, to which she had perfect freedom, came to my door, and, quite unusual in cat language, waited white baby dog, like the man was selltill she was told she might come in. The good creature placed herself before the bright fire, and purred—to her own great pleasure—a self-invited and truly happy guest. She uever encroached ou this one little special favor. Could even the illustrious 'Jack' have excelled her. when food was the charge?"—Letters to London Spectator.

DING.

"Tis time for our crystal wedding
Said Mr. Frost to his wife,
With a whideally sharp expression
That cut like a two-edged knife.
"The North Wind must be invited.
To bring his friend from the East
And none of our friends must be aghted
Or fail to appear at the feast." So then they began to make ready with speed, regardless of cost,
For the beautilul crystal wadding
Of Mr. and Mrs. Frost,
The North and the East Wind calledfor
Miss Show and old Mr. sleet,
And all of that party logether
Were sure to have things complet.

In honor of the occasion
The houses with fringe they drape,
ilich beads and bugles of crystal
Euspended in every shape,
While all the poles and the chimneys
Were dressed in transparent suits,
And the trees were overloaded
With loveliest glaced fruits.

When any one cried "Hello!"
The magnates were not forgotten,
Who stand in serene repose,

And Franklin made his appearance With an icicle on his nose. There were acres on acres of icing,

Above the scene, in mid-air, Lent a charm to the crystal welding, That proved such a grand affair.

Decenters and tumblers, engraven
With initials of old Jack Frost,
Were scattered about in profusion—
No lelling just what they cost;
And I couldn't begin to mimber
How many from out of town Came in to this crystal wedding And at the banquet eat down

Old Sol get wind of the matter Just as he was going to bed,
And out from between the curtains
He anddenly popped his head
And smiled, as with glowing fingers
He took Jack Frost by the ears, And loosened the pearls and diamonds, That straightway dissolved in lears.

Soon faded the lovely picture,
The limpid and sparkling sheen,
That seemed to our raptured vision
Like unto a fairy scene;
And some will remember the beauty,
And some will remember the cost
of the worderful contain wedding. Of the wonderful crystal wedding Of Mr. and Mrs. Front.

A LADY VIOLENSIC

and, through some local aequaintance I gracefully, accepted.

Iudeed it was a godsend, for I had been offered liberal terms for my ser- if not very choicely expressed. But was vices. This sounds very mercenary, I anticipated from this engagement.

been lately seriously ill, and was now to eover him with coufnsiou by the disouly slowly recovering; but yet need. closure of the facts? ing careful nursing, beside many little too, and already so at home curled n means to provide.

One of his special wants was something to amuse and interest him, something fresh and inspiriting, and which he would not soon get tired of. The worst thing that threatened him now was lassitude and weariness, and the ronsed to make an effort to overcome this he might sink under it after all. I presently it wearied rather than benefit-

little Theo's bedside, playing to him and thing pretty with the money I should some little use, though not in the way get for playing at the concert. So he he had proposed. And I would take my must make up his mind what he would violin, and, playing to the worthy Fublike to have and tell me when I came sey and his -acelieut oic woman,

"Oh, that's a very funny thing to want while restless and uneasy during the evening. you're so ill. You must wait till you He had expected me home before this. get well, and can run about and play and I, not thinking that I should be dewith it. Little dogs are of no use to

little boys in bed." "Oh, yes, mamma; I can nurse him with a special petition, to which my at- and play with him in bed. I mean a ted a little, and there was just a fear

> ing on the sands one day." I knew now what he was thinking of. Before he fell ill we had one day seen ou the beach here a man offering for sale a couple of ladies' lap dogs, little white curly creatures, resembling china ornaments, and equally useless. Dory had wanted me very much to invest in these canine specimeus, and could scarcely be made to understand that the price was prohibitive, and that china ones would do as well. But ever sine

his mind had rnn on white dogs. "Oh! I understand now, Dory," I morrow what she can do; but I am afraid the mau will have sold those by this time. However, we must look about and perhaps we may find another, or something as good."

This contented him, and so I kissed him again and went away to the concert My late trouble and anxiety about my little sick boy. So I said no must make "Whoa, there! Come down with me altogether unequal to it. It was my fairy dog it might disappear any night, your gentle, now !—take it easy, and first public appearance, too, as a violin. If it found it wasn't doing him any good, don't fret!" called the driver, as he entertainments as a pianist and vocalist, to improve. But just now I was dull and apathetic, and in acknowledging the ovation only directed a downcast, half-dazed look at the audience, made a languid courtesy, and retired with a wearied, uncertain gait.
-I felt better when all was over, and I

know, sir, that I ought to have sent this had packed up my instrument and put on my wraps ready to go home. I was dog back to you directly-before you waiting for my escort, when the waiter --if was at the hotel that the entertainment had been given entered the room to announce a "party outside wanting to speak mest particularly to the lady as played the fiddle." He was followed by the "party" in question, who proved to be a stout,

duestion, who proved to be a close florid, agricultural person. He came up to me and shook me heartily by the come such strong friends that I have not known how to part them. But now, not known how to part them. But now, hand, and still held it while he spoke.

"Most delighted, my dear," he said,

"with your playing. Never heard auything like it—me and the old woman too.

We're both very fond of the fiddle-play it myself, but bless me! nothing like you. You must come and see us, if you're staying here. So sorry you're—" here he let go of my hand, and touched his eyes with his fingers-"so very sorry. But here. I've brought you something that'll be a good friend to you, and very useful. It's only a little one yet, but that's all the better. Easier to teach, von know "

He thrust into my arms something soft and warm-something that moved -and backed out of the room with great precipitation, nearly upsetting the waiter, who seemed to have been a seafaring persen, and used the most dreadful expletives. I looked down at the small animated object in my hands, and behold! it was a little white dog-a beautiful Pemeranian pup.

What a singular gift, and who on earth was the doner? And what could he mean by bolting off in that wild way, without giving me time to say a word? The seafaring waiter of the stormy language was appealed to for an elucidation of these mysteries, but he was morose and obscure. Requested to call the eccentric stranger back, he became hoarse-

There was to be a concert by little shay, and well away on the home and tack by this time. Name of Fubsey. Thought you was blind 'cos you played | had made here, I had been offered apart on the fiddle, and give you that there either of us. She's often talked about in the cutertainment. so kindly gave it to me-bnt my little boy here was just then recovering from a long and troublesome illness, and, thinking it would amuse and interest him, I took it home for him to play with. Perhaps you will be pleased to hear that it has been of great use in

enjoyment of the seuse of sight before

other consideration but a mother's solic-

discovered the mistake under which you

itude for a sick and lonely child. I

'No. Mr. Fubsey," I said, picking up the dog: "uo, my dear sir; I am not, in the sense you supposed. But I confess I have been very blind to every

pleasure, and with grateful thanks for the kind intentions with which I am sure you bestowed it." "Tut, tut !" said the farmer, "who's talking about taking it back? When I gives a thing I gives it, and if I gives it in a mistake, more fool me for making of it, and a unfeeling, blundering old brute beside, to go and take you for a blind womau. My dear, I'm as pleased as anything to find as I was wrong; and as for taking back the dorg, why, I wish I had half a dozen mere to give you for

that pretty speech of yours.'

sir, I think we can spare Fido; and if

you will take it back I will resign it with

'Oh, thauk you, sir, but I don't. really," I said nervously. "One is quite as much as we can manage, isn't And then I made him shake hands with this estimable Mr. Fubsey, and told him he was the geutleman who had brought us . Fido, and that the fairies were not going to take it back again; so we would take it home and keep it-I

and take him something for his pretty and interesting little present. "Jump in now," cried the old farmer ndicating the chaise. "Jump in, both "Tain't no good. Gone aboard the of you. I'm going straight home, and the missus will be as pleased as Funch to find we've been in a miz-maze about you, and that you can see as well as come, jump in, and we'll just be home in time for dinuer.' "Thank you very much, Mr. Fubsey, but, if you please, not now. It is so sudden, and I am quite unprepared;

> I have your address, but when I come there is something I must bring with me that is just now at home." "Meaning the tiddle?" cried the old man, catching brightly at my meaning; 'that's right, bring the fiddle and play to us. Come when you like, or let's know when you're coming, and we'll send the shay over for yon. Bring the dorg, and the boy, and all, and we'll make you comfortable."

and, beside, Dory must not be out too

To end my story as briefly as may be. Dory and I soon paid a visit to the farmhouse, and I took my violin and diseoursed sweet sounds, with all the art and skill that I was mistress of, for the gratification of my homely but most appreciative patrons. They were delighted with my performance, but much more with the curious circumstances lending up to our present acquaintance; the genial old farmer laughing so heartily at his blunder concerning me that I was

Scenery and Bumps.

In Nevada two rival coaches started nt on parallel roads each four team on a gallop. A New Yorker, being the only assenger in one eoach, took a seat with the driver. He endured the first live miles very well, as the road was pretty smooth, but he finally carelessly bserved :

"This pace is rather hard on the horses, sn't it? "Oh, no! They are used to it. I naven't begun to swing 'em yet," was "If you were going a little slower, I ould enjoy the scenery mneli better." "Yes, I s'pose so; but this line isn't un on the seenery priuciple."

That ended the conversation until the orses turned a corner, and the stage rode around it on two wheels. Then the New Yorker remarked: "I suppose you sometimes meet with accidents

"Almost every day," was the brief 'Is there any danger of something giving way?" "Of course: but we've got to take nr chances. G'lang there !" At the end of another mile the passen-

ger controlled his voice sufficiently to in-"What if we shouldn't reach Red Hill by exactly two o'clock? I am in no hnrry. "No, I s'spose not; but I've got to do

"How ?" "I've got an even 'ten dollars' bet that I can beat the other stage into Red Hill by fifteen minutes, and I am going to win that money if it kills a horse.

it or lose ten dollars."

make Dory appreciate it more, of its presentation to me! I pretended it had as he felt for his wallet. "I like to ride fast, but I'm not a bit nervous, but I do hate to see horses get worried. Here's with my playing, and who must have twenty dollars for you! First Love.

A long story in the Wheeling Leader is headed, "Her First Love." We have no time to read long stories, but if it was really and truly her first love it is safe to say he got away. It takes a practiced hand to know just when to reel in, pay out more line, and "play im till he can be landed and put in the basket. It can't be done by a girl with her first love, because of the excitement when she first feels there is one nibbling. causing her to shut both eyes, pull for dear life and throw him fifteen feet into the air, when the look drops out of his month, he falls "slap" into the water and scuds under some old root. The desert of life is strewn all over with the bleaching bones of first loves, who have nal they have no relation. It is the had their jaw torn off so they could not treachery of the dressmakers. masticate their food, -Peck's Sun.

GOSSIP FOR THE LADIES.

The Date in the Ring. The somen dressed her for farewell introwy silk and lace;
A crown of braided hair they set

Her nother bent and kissed her lips, And kissed her braided hair, And bided down the peaceful hands Upn the bosom fair. And weeping, saw on one a ring, A like golden, timeworn thing.

She bok it from the icy hand
All looked for rhyme or name,
Som hing to say wby it was there,
I'm whose fond thought it came.
She hly saw, through many a tear,
A dat long past—day, month and year.

The some schoolfellow's gift," she sighed, "be some schoolfellow's gift,"
"be child forgot to show,"
And ht it back in its own place
Willender touch and slow;
Allowates tiny giller rest
Likebunshine on that quiet breast.

Pain or blessing—who can say How much of either in it lay? We watch the light in our darling's eyes. The lines that the alow years bring,
Yel know as little of what they mean
Asthe secret of the ring.
Joy of sorrow Gold only knows
How much of both lies under the rosa.

The Cost of a Sidewalk Beauty. "Doyou see the young lady swinging own to street with all the style of a your pin-money until you have \$7.15, and you can be a sidewalk beauty and

be much admired." Went Shopping.

"I ain't feeling very well to-day. had nearly said "stick to it"-and some My head aches, my liver is out of order, day we would go and sec Mr. Fubsey, I've get the sciatica, my pulse is feeble, and I expect I'll die before night if I don't take care of myself."

"No," he unswered, groaning, and "I'm so glad, deary. You can tend

don her placed breast they laid the roses as became a maid.

Ab, Bitle ring, you kept it well, The secret of your dale! Winte'er its wearing, it goes untold Beyond the earth and fate;

milliomiress?" said the primer man of the New Haven Register. "She is beantiful, is she not? Wonldn't you like to be as she? You would? Very well, It will cost you \$7 for a set of curled hair-bangs, and 15 cents for cosmeties to give that heautiful color to your cheeks. Be careful and save up

heavens! "And you won't go to the office to-day, dearest?" tenderly inquired his

looking very pale. the children, then, while I go shopping," and she skipped up-stairs to put on her things with a joyous, heart-easy | public clock struck 3. laugh that only the true wife ever

gives reut to. A dress train is a unisance, the lady of fashion admits; but while it is the fashion she must wear it. But what pleasure can there be in looping up or in throwing over the arm these impediments during a brisk waltz, or when elbowing one's way through a crowded parlor? And then, a country stile; over the brink of it, picture it, think of it!" The lady would be more helpless than the hapless Miss Biffin who was once forgotten at a theater. The box-keeper said, "Allow me, madam, to offer you my arm and to conduct you down stairs." Said Miss Biffin, "I am very sorry, but I haven't any arms.' Bless me, ma'am!" observed the astonished uttendant, "then I must trouble you to walk out, as we are gliost. closing the house." "I really cannot

In England it is the dowager mature matron who is an tocrat of everything. It is said, in a legendary way, that the Briton rules his house; but that is as true as other legends, and no more than they. The will of the intelligent wife is absolute law, and her advice is held as real wisdom and her suggestions are honican, who speaks contemptuously of the 'old woman," or the "meddling old girl;" and yet the advanced matron of the mother country is far less youthful in her thought, manner, pleasure and appearance than the American lady, who is of the same age, the same freedom from importuning cares, and the same exemption from sorrow. The tranquillities that come to the Americau are in consequence of a ripening process rather than a decaying one. The composure of the average English woman it is not hypercritical to mention as a refined quality of stupidity, or perhaps, to be more just and conrecous, of torpidity. The furniture of her mind becomes cumbersome, if not immovable, with age; therefore, she cannot be stirred to social innovations, and in her hand lies the balance of power. In fact, the English woman, by nature and habit, is meditative rather than coutemplative, which makes the old easier and more agreeable to her than the new; hence, to the average feminine anthority, a novel amusement, if considered at all, is carefully examined, aud, if it be approved, it is added to those pleasures that have already been consecrated, but it must not displace or even modify them. "To modernize is to vulgarize," is what the English authorities teach their followers, and nobody wishes to be mentioned as doing just that, even though in the seeret places of thought he may desire to. It may be admitted that to be unconventional, even in a few things, would be bliss imme surable to a visitor.

The Great Conde.

The Great Conde, as Louis II, de more inhabitants. Education is in an indifferent condition. According to the Bourbou was ealled, was boru iu the Castle of Vincennes, September 8, 1621. church organizations of the Roman He early displayed his ability as a mili-Catholics, and some twelve or fifteen tary leader, and when only twenty-two organizations of other denominations. years of age was placed in command of the Freuch army in Flanders. At Rocroy, in May, 1643, he defeated the Spaniards, and the next year forced General Mercy, the Bavarian, to retreat after three days In my last paper I asserted that mosquitoes contained a large quantity of of fighting, and again in 1645, he met Mercy at Nordlingen, and engaged in a terrible conflict, in which Mercy was killed, and Conde himself was wounded, animal quinine, and therefore when they bite a person they inject into his system an antidote to malaria and febrile causes but finally achieved another victory. In generally. I had then experimented 1646 he returned to Flanders and took with the mosquito and knew whereof I Dunkirk, and in 1647, in Spain, was unspoke, and since you kindly published successful in the siege of Lerida, but ny communication I have captured speedily sileneed the opposition to him quite a number of these insects, and, by signally defeating the Spanish at Lens, in Flanders, in 1648, this victory maeerating them in a morter with alcohol, have by chemical experiment bringing about the end of the Thirtyaequally precipitated the sulphate of quinia, or quinine of the drug stores, to years' War, and the peace of Westphalia. When the war of the Froude began in the amount of 70 per cent. of the mass. 1649. Conde for a time took the side of the Royalist party and Mazarin, but believing his services were not fully reeognized, resented it, and gave offense, and early in 1650 he was arrested, but subsequently released. Then he raised an army to oppose the Royalists, and met his great rival, Threnne, ucar Bleaneau, on the Loire, April 7, 1652, Chinches, annoying as they may be, where, although Coude had the advantage of superior numbers, Turenne was successful. Again Conde met the Royalists July 2 of the same year, under the walls of Paris, and would have been entirely efeated but for the assistance given by friends within the city. Those who had opposed the Royalists had meanwhile grown weary of the struggle, and Conde in vain urged them to prolong it. He felt, therefore, compelled to join his old enemies, the Spainards, in the Netherlands, but his fortune seemed for a time to desert him, and he shared in the defeats inflicted by Turenne upon his allies, at Arras, in 1654, and near Dnnkirk in 1658. When the treaty of the Pyrenees was concluded, in 1659, he was pardoned and allowed to return to France, where he lived at his-magnificient country seat of Chantilly. He was called back to active service eight years afterward, and early in 1668 couquered Franche-Comte in less than three weeks. Conde was about that time a candidate for the crown dotes of each other, foes by nature, and of Poland after the abdication of John Casimir. In 1672, when the war against the United Provinces broke out, he was single bng, of course, can not overcome placed at the head of one of the armies the quantity of sublimate it comes in that invaded the Netherlands, and was contact with, but the human system bewounded in the arm at the crossing of coming gradually fully impregnated with the jnico of the bug, by their bitthe Rhine. On August 11, 1674, he fought at Senef an indecisive battle with William of Orange, and in 1675, on the death of Turenne, was called to Alsaco to command the French army there, and letters, also formerly separated from her bushand, the colebrated pointer at the bushand, the colebrated pointer at the Now his long and ardnous campaigns began to tell upon him, and he was forced to retire from active service. purposes. Hoor and horn shavings contain more as is contained in average stable manure. SHEEP fed on dry feed are frequently tronb'ed with sore lips. 'An application of sulphur and lard once or twice will generally effect a cure.

CORE trees are being successfully raised in Georgia. The cork on some specimens planted there is already thick enough for use. It is supposed these trees can be successfully raised in most of the Southern States.

Ir requires about 5,000 young fish to stock a poud of one scre in extent. Of fish weighing from one to two pounds 1.000 to the acre is a liberal estimate and these will require artificial feeding unless the pond is very rich with foodproducing vegetation.

Poraro flour, or the dried pulp of the potato, is obtaining great importance in the arts. It is stated that in Lancashire, England, 20,000 tons of it are sold annually, and it brings at present in Liverpool about double in the market as wheat flour. It is used for sizing and other manufacturing purposes. Ir is estimated that with abundant

fodder, a medium-sized animal will produce in a year the following amounts of manure: Horse, exclusive of loss during work, nine tons; ox or eow, ten to twelve tons; sheep (October to May), three-quarters of a ton, and a hog one and a quarter to two tons.

Many dairymen practice milking their cows steadily without allowing them to go dry. They feed heavily on corn meal and oil cake until the milk fails, when the cow is replaced by a fresh one. A dairyman who keeps one hundred and fifty cows says such a practice is more profitable than to lose the time between their going dry and coming in.

BE CAREFUL about permitting cattle to drink from ditches or from poels in which their droppings are deposited. Such impure water is not only liable to injure the health of the stock, but is also a fruitful cause of malarial and typhoid fever among those who use milk product from cows thus watered.

THE general food of the Norwegians is rye bread, milk, and cheese. As a particular luxnry peasants eat "sharke," which are thin slices of salt hung meat, dried in the wind, but this indulgence in animal food is very rare indeed. A common treat on high days and holy days consists of thick hasty-pudding or porridge of oat meal or rye meal, seasoned by two or three pickled herrings or salted mackerel.

THE quality of stable maunre depends upon the quantity and quality of the feeding stnffs nsed, and on the amount of milk or other products obtained from animals As a rule but a small pro portion of the manurial elements of the food are permanently retained in the body or excreted as milk, etc., while the remainder passes into the manure. As a consequence, the richer the feed the not only through increased production by the animals, but through the improved quality of the manure as well.

Under drains were used by the Romans and constructed of wood. Even | bake a rich brown. brush drains have been made in various parts of England. Thorough drainago came into practice about the middle of the present century, through the exertions of Mr. Smith, of Deanstone, and for a time stone was the principal material used in their construction. They were either thrown in promiscuously or laid out in throats or channels. When tiles or pipes came into use stones were laid around them, but it is found that less soil percolates into the tile when the earth is close around it.

THE following is given as an excellent method of plucking poultry: Hang the fowl by the feet with a light cord; then wilh a small knife give one eut across the upper jaw opposite the corners of the mouth; after the blood has stopped runuing a stream, place the point of a knife in the upper part of the month, run the blade on into the back part of the head, which will cause a twiching of the muscles. Immediately following this operation is the proper time for placking the fowl, as every yield as if by magic, and there is no danger of tearing the most tender chick.

HISTORY snows that the establishment of the beet-sugar industry in France and Germany was the outcome of not one year, but twenty years, of careful scienific work. Many experiments proved failures, and many men were found who said from the first that the manufacture of sugar from beets was a commercial empossibility. But in spite of adverse criticisms, partial failures and the opposition of many interested parties, the beet-sugar industry did succeed, and today two-fifths of the sngar consumed by the civilized world is manufactured, at a profit, from sugar beets.

It is a practice with many farmers to place a load or two of somewhat green hay on the top of the mow, thinking that it will dry under such eircumstances without injury, and finally turn out pretty fair hay. This is a mistake. greenest hay should be placed at the bottom of the mow; it will heat some and throw off the moisture, and the hay will come ont bright green and full of aroma. Place the poor bog hay on the top of the mow, and it will absorb such moisture as ascends from the sweating hay below, and though un-doubtedly it will prove somewhat musty, yet such would also be the ease with the good hay if placed, on the top of the mow. If farmers will try this plan, they will find they will have first-class hay in

A New York exchange says the farmers of Hunterdon and Somerset counties, N. J., use coats to protect their sheep from dogs. Two goats can drive away a dozen dogs, and two are about all each farmer puts in with his sheep. As soon as a dog enters the field at night the goats attack him, and their batting propensities are too much for the canine, who soon finds himself roll-

the canine, who soon finds himself rolling over and over. A few repetitions of this treatment causes the dog to quit the field, limping and yelling. Formerly, when a dog entered a sheep field at night, the sheep would run wildly around and cry piteously. Since the goats have been used to guard them they form in line behind the goats, and seem to enjoy the fun. The idea of utilizing goats in this way came from the West, where they are put in sheep pens to drive away wolves.

the tub, she stood the whole, baby and all, over the gas stove. Presently the heat is effect. The bottom of the tub began to be hot and the child wriggled around in a way which showed that he was uncomfortable. As it grew hotter and hotter he set up his little pipes in a piercing yell.

The mother was not greatly alarmed by this, for since the days of Cain, the first recorded infant, it has been customary for baby boys to yell when they felt like it. But soon the heat increased so

An American traveler in Italy who, though noticing many fields of Indian corn growing there, yet uever found either Johnny cake, hoe cake, hominy, or any similar delicacy on the hotel tables, was somewhat at loss to know what use was made of this cereal. what use was made of this cereal. He writes: "Where a part of this corn meal goes I have discovered. It goes into horse-bread. Horse-bread is, of course, the bread on which Italian horses are fed for all horses between the break or the bre are fed, for all horses hereabouts are baited on loaves of bread. Passing along the streets anywhere in any of these cities, and as far north as Munich, these cities, and as far north as Munich, you see a man on almost every corner holding a loaf of bread in his left hand and a knife in his right, and cutting off slices and feeding to his horse. It is an odd sight at first. Examining this bread, I find it is made of wheat or rye, with out meal and corn meal added. It is generally soft and sweet. At Milan I had grown rather tired of the iron-clad table bread, dry and tasteless within, but with a crust so thick and shiny that it was almost impervious to assault; so I

went out on the street and got a couple | TEXT OF THE MONROE DOCTRINE of slices of horse-bread. Itwas far more acceptable to the party than the bread on which we were being fed. Some of this coin meal, too, finds its way into the "black bread" fed to the army. Soldiers are everywhere present in Italy, and every day detachments go along guard-ing great wagons pitched high with these gloomy-looking loaves, covered with dust and dirt, and seeming entirely than twenty-five times as much nitrogen | too filthy even for horses to eat. This is the chief food for the army."

HOUSEHOLD HELPS.

[From the Detroit Frea Press " Household."] ONE EGG CAKE. One egg, butter size of a large egg, two cups sugar, three cups flour, one teaspoonful soda, cup of sour cream.

Broccoll.-Wash nicely; ent off the green leaves and hard stalk; boil in water with a little salt about twenty minutes. Send to the table with pepper and melted butter poured over it. White Cake. One emp butter, two cups angar, one cup sweet milk, whites of five eggs, three cups flour, two teaspoonfuls cream tartar, one teaspoonful

soda. Bake in a moderate oven. Fig Junies. -One cup of butter, two cups or sugar, half a nutmeg, one heaping enp of chopped figs, two eggs and thour enough to roll thin after thoroughly mixed. Dates can be substituted for figs, and are very nice. Bake in a quick

BROWN BREAD .- Two caps of Indian meal, one half-cup of coid water, well stirred; add one quart of boiling water and let it cool, after which add one cup of molasses and a small soaked yeast cake; stir as thick with flour as possible and let it rise over night; theu knead lightly, let rise, and bake slowly.

SHORT CRUST .- Take one pint of sille. lonr, a little salt and a enpful of lard Make a hole in the flour and put in the lard; break the lard into small pieces with the fingers (do not rub it.) Then mix with cold water-roll quicklyquite thin. This wilt make two pies with an upper crust. Bake a good brown.

SPANISH CHAILOTTE.—Put a layer of cracker or bread crumbs on the bottom of a pudding-dish, and a layer of any kind of jelly or canned fruit over them. Continue the layers alternately until the lish is three-fourths full, then fill up with a rich custard and bake, serve with a sance. If preferred cold, serve with

sugar and cream, if liked. VEAL BROTH .- Put the knuckle of leg or shoulder of veal, with very little meat on it, an old fowl, and four shank bones of muttou extremely well soaked and bruised; three blades of mace, ten pepper-corns, an onion and a large bit of bread, and three quarts of water into a stew-pan that covers close, and simmer in the slowest manner. After it has boiled up and been skimmed strain and take off the fat. Salt is wanted. It will

require four hours to prepare. How TO COOK CAULIFLOWER, -Wash carefully so as not to break off the sprouts; tie the green leaves over the Americans. flower, cut off the hard end of the stem ; boil in plenty of water with a little salt a large head will cook in twenty min utes; take it out, cut off the leaves and stalks, lay them nicely in the dish; sprinkle with black pepper and pour melted butler over them; servo hot. richer the manure. Good feeding pays French Method.—Prepare and boil as above; when done trim off leaves and stalk, lay iu a baking-pan; pour a rich roast gravy over them, then sprinkle toasted bread crumbs on the top and

> PICKLED CAULIFLOWERS.—Cut off all the green leaves; put the cauliflower into boiling water with a good supply of salt; boil three minutes only; take out and in pieces convenient to put into jars. Make a mixture of one tablespoonful of of ginger, two of white mustard seed. and red-pepper pod to every gallon of the best cider vinegar. Let this mixture boil and pour boiling hot upon the cauliflowers; cover them closely and let them stand a week; then pour off the liquor, scald it, return it again hot to the cauliflowers, and in twenty-four hours they ought to be pickles. Use the best eider vinegar, if not it will discolor the cauliflowers. Broceoli may be prepared in the same manner, but is not as handsome as the cauliflower.

In All Her Igaorance.

The ignorant young lady may be a beantiful creature, graceful in her manpossessed of a sufficient stock of conversational power to entrap some poor fellow into matrimony. Under our laws there is no bureau of examination to test her qualifications for assuming the responsibilities of married life. The young man who takes her for better or for worse can aet as examining board at his leisure and report at his convenience or to the divil.' inconvenience, as the case may be. He is likely to find that although she may have entranced him with the fluency of her speech at party or ball during the blissful experience of courtship, her endeavors at housekeeping are anything but blissful. When she undertakes to bake biscuits the products of her first days' work may be sold either for pavingstones or base-balls. When she wrestles with cobwebs the industrions spider gets the better of her. When she attempts to set a room to rights she leaves it looking as if her neighbors had been

holding a pienie in it. But it is when the ignorant young lady becomes a mother that her natural lack of knowledge is most conspienously displayed. Such a case has recently been brought to light in one of the pretty villages on the Hudson Biver. The lady had been brought up among surroundings of wealth and luxury and had allowed much useful information to skip past her without taking the trouble improve it. One day it became necessary to give her bouneing baby boy a bath in his little tin bath-tub. Sho put him into water which was too cool for him, when happily her mother-in-law came into the room and told her that the child would be chilled to death unless the water were made warmer. She knew that heating water generally made it warmer, and so, instead of adding some hot water to the cool contents o the tub, she stood the whole, baby and

much that the baby, with one agonizing scream, kicked the tub over and rolled out on the floor, npsetting the gas stove, drenehing his mother with scalding water, and summoning the affrighted mother-in-law to the reseue. While young Mrs. Ignorance was busy fainting, the old lady and the servauts gathered up the parboiled infant and put him in a place of safety. Thus does the young woman who never learned in girl-hood become acquainted with the relations of hot water to babies and of babies to hot water. It is never too late to

learn. - Philadelphia Times.

the state of the s

See Monroe Annual Message, December A. 1822. "With the governments which have deelared their independence and maintained it, and whose independence we have, after great consideration and on just principles, recognizéd, we could uot view any interposition for the purpose of oppressing them or controlling in any manner their destiny by any European power, in any other light than as the manifestation of an unfriendly dis positiou towards the United States.' It has been asserted that Huskisson, Frauklin's friend, wrote this declaration and transmitted it, with the consent of Canning, his chief in the Cabinet, to J.

Q. Adams, who was Monroe's Secretary of State. The precise lauguage, confining the loctrine to the States recognized by the United States, and excepting from it all not free-including Canada, Cuba, indeed the whole West Indies, Brazil, Buenos Ayres favor this view. We do not know whether it has ever been de-

J. Q. Adams did subsequently, in special message to Congress, say: Most of the new American Republics have declared their entire assent to them (the Monroe declarations), and they now propose, among the subjects of consid eration at Panama, to take into considcration the means of making effectual the assertion of that principle, as well as the means of resisting interference from ahroad with the domestic concerns of the American Governments.'

The italies are in the message, and he ided subsequently: 'The purpose of this Government is to ineur in none which would import lostility to Europe, or justly excite resentment in any of her States.

'Our views extend no further than a mutual pledge of the parties to the ompact to maintain the principle in application to its own territory, and to permit no colonial lodgments or establishments of European jurisdiction upon its This may be called Adams' addition

Secretary of State. Adams' addition, rather than Monroe's verbiage, has remained in the popular mind as the Monroo doctrine; and even Congress, in including that of the Confederation at Richmoud, 1862-4, has al-

to the Monroe doctrine, Clay being his

ways so treated it. The Panama Congress, called by Bolivar, never adopted either Monroe's or Adams' text. It indeed adjourned without fairly considering the doctrines. The members were, in fact, disappointed that the United States had receded from Monroe's declaration, and now proposed that each State should, for itself, on its own soil, resist European interfer-

They wanted an American Conrederation organized for the purpose of driving ut European inrisdiction. The project turned out to be impractieal, and was dropped even by South

A Lost Alligator Recovered.

About eighteen months ago the Zooegical Garden loaned to the Exposition a young alligator two feet long to adorn the caseade in Hortieultural Hall and give an appearance of wildness to the urtificial scene by the presence of animal life of a repulsive kind. The alligator behaved very well for sometime, and satiated his appetite with bugs, flies and But one night he disappeared, and he was mourned for lost or stolen, although the Commissioners thought that there was no man in Cindip in clear cold water one minute; cut | cinnati mean enough to carry away an alligator. In a few months the absence of the loathsome creature was forgotten, mace, one of cloves, one of allspice, one and it was believed that he wandered off and died.

Recently it became necessary to hire the services of a gas fitter at Music Hall and Mr. Tom Wise sent for Mr. P. J. Hogan to connect the street gas with the Music Hall Building. It will be remembered that the Elm-street front of Horticultaral Hall is about three feet above the level of the part used for the cascade and exhibit of plants. Into this raised portion Mr. Hogan went boldly with a wrench and lantern, but he had scareely disappeared from view when a poor plumber, without lantern, hat or ployed by his inimitably good company tools, rushed out to where the astonished Wise and his assistants stood. Hogan's hair stood up like bristles on the fretful porcupine, and his eyes rolled with such an expression of terror that the other men shrunk from him. He could hardly ejaculate: "Be J-s, I'll not go in there agin. There's the most inferrnal-lookin' eratur I ever saw. It opened its big jaws and wagged its baistly tail at me, and wanted to ait me np. Be heavens, when it moved I moved, too. The gas may go

Mr. Wise, thinking the man frightened without cause, undertook to explore the eavern and beard the monster in his den. but he was only absent a few seconds, and made quicker time in reaching daylight than Hogan. He stayed long euough, however, to find out that the riptile was an alligator, and at a rapid glance seemed to measure four feet in leugth. Here, then, was the alligator which was supposed to be lost, and Hogan had found him. It had probably crawled into this retreat and had hibernated in the moist, marshy ground. The food which Mr. Alligator had indulged in probably consisted of rats and small bugs and insects. At any rate, he was still alive and increased his length during his mysterious absence about two feet. But there seems to be a disposition to let him severely alone for the time being. Later the floor was removed and Mr. Alligator was captured and returned to the Zoological Garden.—Cin- I'd try a bottle for the rheumatism." cinnati Enquirer.

Act Well Your Part.

he thinks the highest truth, lest it should be too much in advance of the time, may reassure himself by looking at his aets from an impersonal point of view. Let him only realize the fact that opinion is the agency through which character adapts external arrangements to itself—that is a unit of force, constituting, with other such units, the general power which works out social changes; and he will perceive that he may properly give full utterance to his innermost eonvictions; leaving it to produce what

effect it may. It is not for nothing that he has in those sympathies with some principles the time.

descendant of the past, he is a parent of the future, and that his thoughts are as children born to him, which he may join a well-disciplined body to a well-not earelessly let die. He, like every regulated mind; for with mind and other man, may properly consider him-self as one of the myriad agencies through whom works the unknown by the weaker, although in moral as in cause; and when the unknown cause domestic economy matters are best conthereby authorized to profess and act able, and where both are agreed. out that belief. For, to render, in their highest sense, the words of the past:

The Showman's Trade.

A showman, after assuring a reporter Mr. Springer rose. that nothing pleases the people more than something full of peril and bloodshed, gives the following incident of his eareer; but we don't vouch for his truthvield to me. fulness-that is, not quite: "I ran a whole season on a lion that the unfinished business. had eaten a keeper. The people came in crowds, expecting overy day to see him make a breakfast of his trainer. Was he

actually dangerous? Dangerous! He eat another trainer, and then I lost him. His widder was actually in love with her husband, and she swore the animal should be killed, and the people sided with her; and as the beast was getting for the yeas and nays." old, and the killin' made a paying sensa-tion, I did it. But I made all there was out of it. I iusisted that the husband taken, by yeas and nays." should have a gorgeous funeral. She said there was nothing to bury, as the lion had eaten her husband. 'But ain't the dear departed in the lion? If we bury the lion, don't we bury the dear departed?' 'Cert,' she said. And we had it, and it was gorgeous. We had a percession with all our wagons in it, regular street parade, only all our riders had black searis ou 'em, and the wagons and horses and elephants and sich wero draped in black, and the band played a dead march. The widder was in open carriage in full monruing, with a white handkerchief with a black border to her eyes, lookin' on his minatoor, Ther wasn't no minatoor, but she held a case just the same. That night the canvas couldent hold the people. We run that two weeks to splendid biz. When the woman got over her grief, she went into the lion trainin' herself, ez 'Senorita Agnardente, the Lion Queen,' I gave her some old lions to practice on, and in less than a month she could do jest as well as the old man. She was a good woman, too. She rid in the grand entree, and rid in 'Tho Halt in the Desert, did the bar'l act, did a good padact, and is now practisin' bareback. She juggles tollable, and does a society song and danco in a side-show. When I get

O, I know my biz." Teny l'aster in Trouble. Touy Pastor, of New York, who is now with his inimitable variety combination, making a tour of the principal cities of the Union, is recognized as the leading haracter vocalist and variety performer of the United States. He owns and runs a first-class theatre ou Broadway, New York City, and has gathered about him the best troupe of variety artists that could be obtained. The company has just completed a brilliant engagement at the Walnut-street Theatre, Philadelphia, and after the present tonr they will reappear in Tony Pastor's own theatre in New York City. Mr. Pastor is the originator of his peculiar school of character singing, and has made himself immensepopular, having realized by his talents

a large fortune.

talent, I pay and keep it. My treasurer

changes the names of my people every

season, so as to have fresh attractions.

The writer of this article met Mr. Pastor recently at the Bingham House, in Philadelphia, and found him as genial n private as he is amissing before the public. During onr conversation I inquired as to his physical health, and he eplied that, notwithstanding the strain pon him in the discharge of his professional duties, it was excellent. He and occasionally severe pains, either the result of rheumatic attacks or colds, but any complaints of that character never troubled him long, as he had found out a remedy for all such annoying affections. I asked him what the remedy was, and he replied, "St. Jacobs Oil." I then learned from Mr. Pastor that he considered the Great German Remedy an excellent preparation for the cure or relief of rhenmatism, and that it was about the only thing used among professional people for that distressing complaint. He took bottles of it with him whenever he went traveling, and would not be without it, and knew that it was very popular with a number of members of his own com-pany. A conversation held subsequently with various members of the organization revealed the fact that St. Jacobs Oil had been performing most invaluable service for them in the way of curing them of rhenmatism. Nearly every artist in the troupe used it, and was enthusiastie in its praise, and the writer was really forced to the conclusion that Tony Pastor was certainly in luck in having so valuable an article known aud emof performers, for it enabled every one to be always in his place, thus insuring comfort to the management and genuin satisfaction to the public. Tony Pastor would certainly be in trouble without St. Jacobs Oil. At least, other managers whose artists have been temporarily nnsupplied, have noticed the difference between St. Jacobs Oil in stock and St. Jacobs Oil out of stock-among the members of their companies.-N. Y.

In Other Words, It Don't Pay. A New York street-car conductor having spent, nearly the whole of one day arresting and proseenting an evil boy who threw a lump of coal through the ear window, a philosophical comrade on the same line observed: "Often dem boys make det foolishnesses. But I bodders not mineseluf mit dot. Neffer I gan see dot boy vat makes him. Vat for shall I? Ven I see him, I lose me a halluf a day, goin' by de gourt. De gompany pays me notting for dot. Maybe it was bad for de bassengers dot dheir eyes got knock owit by dem boys. but I don't can afford I bodder mineselluf

by dot." "ALL through advertising," remarked ex-Mayor Gregory, to us as he went homeward with a bottle of St. Jacobs Oil, "that I bought this. Your paper contains so many wonderful cures-of course they are facts-and so I thought Madison (Wis.) Daily Democrat.

With the exception, perhaps, of Mme. Edmond Adam, the Countess gathers around her more people of distinction than any other lady who receives in Paris. Probably there is not another apartment in Paris so filled with eurosities from all parts of the world. The salon is like fairy land. Filled with exquisite Chinese cabinets, mirrors, chandelier, clock and candlesticks of Dresden china, ctc.; its walls inlaid with panels of mother-of-pearl; sofas and chairs, representing all periods, and covered with the rarest embroiderics and tapestries, it presents a tout cuscuble at once dazzling by its beauty and surprising from its harmony. The other rooms are equally beautiful—the dining-room with chairs and table of marqueterie and sideboards of same, gleanning with silver, lighted by a superb carved brass chandelier; the countess' own room hung with India shawls and furnished with claborately earved oak, and Japanese toilet articles; the room of a favorite daughter finished with rosewood and gold satin, with amberglass toilet articles; the boudair hung with tapestry framed in pink and gold, with Louis Quinze chairs and consoles; every corner of the department displaying artistic treasures-all these are more beautiful than words can tell. We must not forget the ante-chamber, with its fire-place and grand old andirons; the sereen, six feet high, which, unfolded, represents. by six oil paintings, tho early Kings of France; the superly mirrors in carved frames; the Louis Quatorze chairs-but, words fail to give a description of all the

beanties of this marveious house. Some old wooden wheels were discovposes. The wheels were eight in numher, the spokes and felloes of pine, and the axle and its suport of oak. They are supposed to exceed 1,450 years of age, yet the wood was in a perfect state of preservation, having been thoroughly immersed in water charged with salts of copper and irou. A similar instance oceurred in San Domingo, an old wooden wheel being discovered in a disused copper mine. How long it had been there is uncertain, but it was completely preserved, owing to its having absorbed considerable quantities of iron and copper. The preserving quality of these

minerals for the impregnation of wood is well illustrated in the mines of Hallien, Austria. the timber used being the same which was originally introduced anterior to the Christian era, and which is even now in a perfect condition.

(Ciucinnati, Irish Citizeu.) EUREKA! Read and Judge for Yourself.

As a general rule we do not pin our

faith to specific remedies; but there is no exense for skepticism in well developed and authenticated facts. Since its introduction to the American public, the great German Remedy, St. Jacobs Oil, has advanced with more rapid strides in the estimation of the public than any tising. We write this for the benefit of ways in England is proportionally twice to the theater and leaves his wife at divers ailments for which the oil is announced as a specific remedy, and we are our notice; proof voluntarily and gratefully brought by people who have tested The milk of the elephant contains less "just for a minute" and returns the its merit and are anxious to acknowledge the great benefit derived. In the enuhau that of any other animal.

The fellow who goes out between meration of such people it is necessary to be specific, and to this end we have obtained their permission to give their names and addresses, in order that the afflicted may have the advantage of a personal interview or postal correspondence, and in evidence that what we write is a candid statement and not a mere puffing advertisement. Mr. Frank Letcher, of No. 4321 West Fifth Street. ussures us that for a series of years he was prostrated with rhenmatism until lifo becamo emphatically a burden. He had exhansted the advertised remedies, and had lost all faith in the efficacy of anything to afford relief when a friend, who had tested the virtne of the oil, mado him a present of a bottle, and, to Frank's wonder and delight, the first application afforded sensiblo relief; while perfore the bottle was exhausted and aches had disappeared. He is a hew

man, and a walking advertisement of the infall bility of St. Jacobs Oil. Alovus Reidy, on the corner of Eastern Avenne and Lewis Street, was afflicted for three years in a similar manuer, and is now hale and hearty, although he still continues the use of the oil. C. O'Callahan, of 171 Sycamore

Street, is another grateful witness to the infallible power of the remedy, which, he says, has made a new man of him. Thomas Lewis, of 62 Butler Street, was for seven years afflicted with that dreadful malady, Sciatica, and being induced to try St. Jacobs Oil, found almost immediate relief therefrom, and is now perfectly cured. He is prepared to substantiate this statement under oath. John Miller, of 54 West Fifth Street,

was eured of a complicated ease of rheumatism of ten years' standing, and George Hollinger, who lives on the corner of Torrence and Columbia Avenues, adds his testimony to its efficacy, and has assured as that his pains were relieved as if by magic. The above statements are by well known and respectable citizens of Cin-

cinnati, and with all who know them will carry conviction upon the face. Hence it is we deem it a matter of duty to snffering humanity to give them all the publicity in our power.

HOW LOST, HOW RESTORED Just nublished, a new edition of Dr. Culverwell's Celebrated Essay on the radio of Spermatorrings or Seminal Weakness, Involud-lary Seminal Lossos, Importancy, Mental and Physi-cal Incapacity, Importunents to Marriage, etc.; also-Consumption, Epilarsy and Firs, (aduced by self-Indulgence or sexual extravagance, &c.

The celebrated author, in this admirable Essay, clearly demonstrates, from a thirty years' sucressful practice, that the atarming consequences of settabuse may be radically cured; pointing out a mode of cure at once simple, certain, and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheapty, privately, and radically.

This Lecture should be in the hands of every youth and every man to the land. youth and every man to the land.

Sent under seal. In a plain envelope, to eny address, post-paid, on receipt of six cents or two post-
